

# GLOBAL SPARE PARTS GUIDE 2022

## ONLINE TRAINING PROGRAM

Aqua Lung offers online training courses at <https://training.aqualung.com/login/index.php>

Successful completion of a course results in a printable wall certificate acknowledging the store or technician and provides access to repair manuals, associated schematics, bulletins and resource materials.

### BENEFITS:

- Online courses serve as a qualification program and an up-to-date reference source
- Training can take place anytime 24/7 and anywhere the internet is available
- Each course contains multimedia, text, photos, illustrations and videos and can be paused and resumed as needed with knowledge retention measured by quizzes along the way
- After the course has been successfully completed, the student may return as often as they wish as long as they remain employed by an Aqua Lung dealer.
- Allows Aqua Lung to communicate directly with service department personnel
- Affordable, the \$25.00 to \$40.00 per course fee can be recovered by servicing just one regulator. (discounted multi-course packs available)
- Also available are no charge product training/information courses for sales staff.

# HOW TO USE THE SPARE PARTS GUIDE & PRICE LIST

The Spare Parts Guide is designed to be an easy-to-use reference for locating currently available part numbers for most Aqualung products, including regulators, BCs, valves, instruments and rubber goods. It is not intended to be a substitute for the various Aqualung Repair Manuals. Because the schematic drawings and parts listed contain the most recent revisions to the products shown, this document should be referred to exclusively whenever ordering replacement parts.

## Finding the part number and price

There are three simple steps for finding a part number and its price:

- Find the product in the Table of Contents of this catalog and turn to the appropriate page.
- Find the part in the exploded drawing and note the key number. Find the key number in the parts listing located below the exploded drawing. Next to the key number is the part number.
- Refer to the **Spare Parts & Specialty Tools Price List**, and locate the part number. Next to the part number is the dealer price and retail price.

## Mandatory overhaul replacement parts

Some products have mandatory overhaul replacement parts, which should be replaced every time the product is serviced. Any part in **BOLD ITALICS** is considered a mandatory overhaul part, and should not be reused under any circumstances after the product has been disassembled. These parts can be ordered individually, or in complete kits which are available for each model regulator.

## Parts no longer available (NLA)

Some older, discontinued products have parts that are no longer available. If a part was never or no longer available, the letters NLA will replace the part number in the parts list.

## Parts no shown (N/S)

Part are available but not shown on the schematic.

## Using the Part Number Index

If you know the part number for a specific item and want to find where it is used (or isn't used), you will want to use the Part Number Index. To use the index, you first need to locate the part number in the listing. Next to each part number are the page numbers on which the part can be found. If, for example, you want to know what products use the RG912198 medium pressure seat, you can refer to the Part Number Index, where you will find the pages to the products that use RG912198.

## A Reminder

Parts may only be sold to Authorized Aqualung Pro-Line Dealers, and must be installed only by technicians who have received factory authorized training. Proper storage is important to ensure the quality of these parts. Be sure to store parts in a manner to prevent premature degradation of rubber and other soft materials, and to prevent damage to those parts which contain delicate sealing surfaces.

# PRODUCTION DATE & SERIAL NUMBER IDENTIFICATION GUIDE

In order to identify the production year or model generation for an Aqualung / Apeks product, it is necessary to note the serial number of the specific product in question.

## Serial Number Information: **IMPORTANT**

Serial numbers DO NOT contain the letters “EN” or “CE”. These numbers refer to a European Standard for that product. If you cannot locate your serial number, please refer to the following information for assistance.

## AQUALUNG/APEKS REGULATORS

For Aqualung and Apeks regulators, the serial number of the first and second stage of a complete regulator is identical. Octopus and Partner sets show individual serial numbers and must be treated individually.

### Serial Number Location:

- **1st stage** - The 7-digit serial number is readily visible on the first stage.
- **2nd stage** - The serial number is laser etched into the 2nd stage case. The location varies by model.
- **Airsource3** - The serial number is located just above the exhaust valve and always starts with a letter followed by 5-digits then 2-letters again (example: R01030MN).

### Production Date Identification:

- **Aqualung Regulators From 2000 - 2009** The first digit of the serial number indicates the production year  
From 0 to 9 = 2000 to 2009:

0 for 2000  
1 for 2001  
2 for 2002  
3 for 2003  
4 for 2004

**Example: Serial Number 6062501** the year of manufacturing is **2006**

- **Aqualung Regulators After 2010** A letter marks the production year  
From 2010 Forward:

A for 2010  
B for 2011  
C for 2012  
D for 2013  
E for 2014

**Example: Serial Number J012401** with J being the 10th letter of the alphabet, the year of manufacturing is **2020**

- **Airsource3 - 2014 to Present:** A letter marks the production year. Starting with “Y” for year 2014 and then starting over at “A” for 2016. The next 5-numbers are the unit production number for the year

Y for 2014  
 Z for 2015  
 A for 2016  
 B for 2017  
 C for 2018

**Example: Serial Number B12401MN**

**B=Year 2017**

**12401=The production sequence number for 2017.**

- **Apeks Regulators From 2000 to Present:** The first two digits of the serial number indicates the production year: While the second two digits indicate the month. The remaining 4-5 numbers are sequential numbers.

00 for 2000  
 01 for 2001  
 02 for 2002  
 03 for 2003  
 04 for 2004

**Example: Serial Number 200612345**

**20 = year 2020**

**06 = June**

## AQUALUNG DIVE COMPUTERS

In order to identify the production year or model generation for an Aqualung product, it is necessary to note the serial number of the specific product in question.

### Serial Number Location:

Serial numbers are located on the outside of the box from each product, on the back of each product and also in the sub-menu from each product.

### Production Date Identification:

- The first digits of the serial number indicates the production month, followed by the second two digits ..... indicating the year and thereafter a sequential number

**Examples:**

- 918013364 for September 2018**
- 117009678 for January 2017**
- 217015030 for February 2017**
- 416002341 for April 2016**
- 516003109 for May 2016**

## BUOYANCY COMPENSATORS (BCD'S)

### Serial Number Locations:

- The Warning tags have both the S/N and LOT# on them. They are located in several locations. Under the back pad of the BC, they can also be located inside the BC pocket.
- Earlier Sea Quest and Aqualung BCDs have a serial number tag is located behind the hook-and-loop inflator hold down on the left shoulder. This does not have the LOT# on it.
- 1st generation Wave - It does not have a serial number. Use the LOT number located at the bottom of the Warning tag located in the BC pocket.

### Production Date Identification:

The LOT# is what is used to read the date code. The attached image shows the LOT# 12086AD001. We want to look at the first 5 numbers to identify the year and day of manufacture.

**Example: Lot# 12086AD001**

**12 = year 2012**

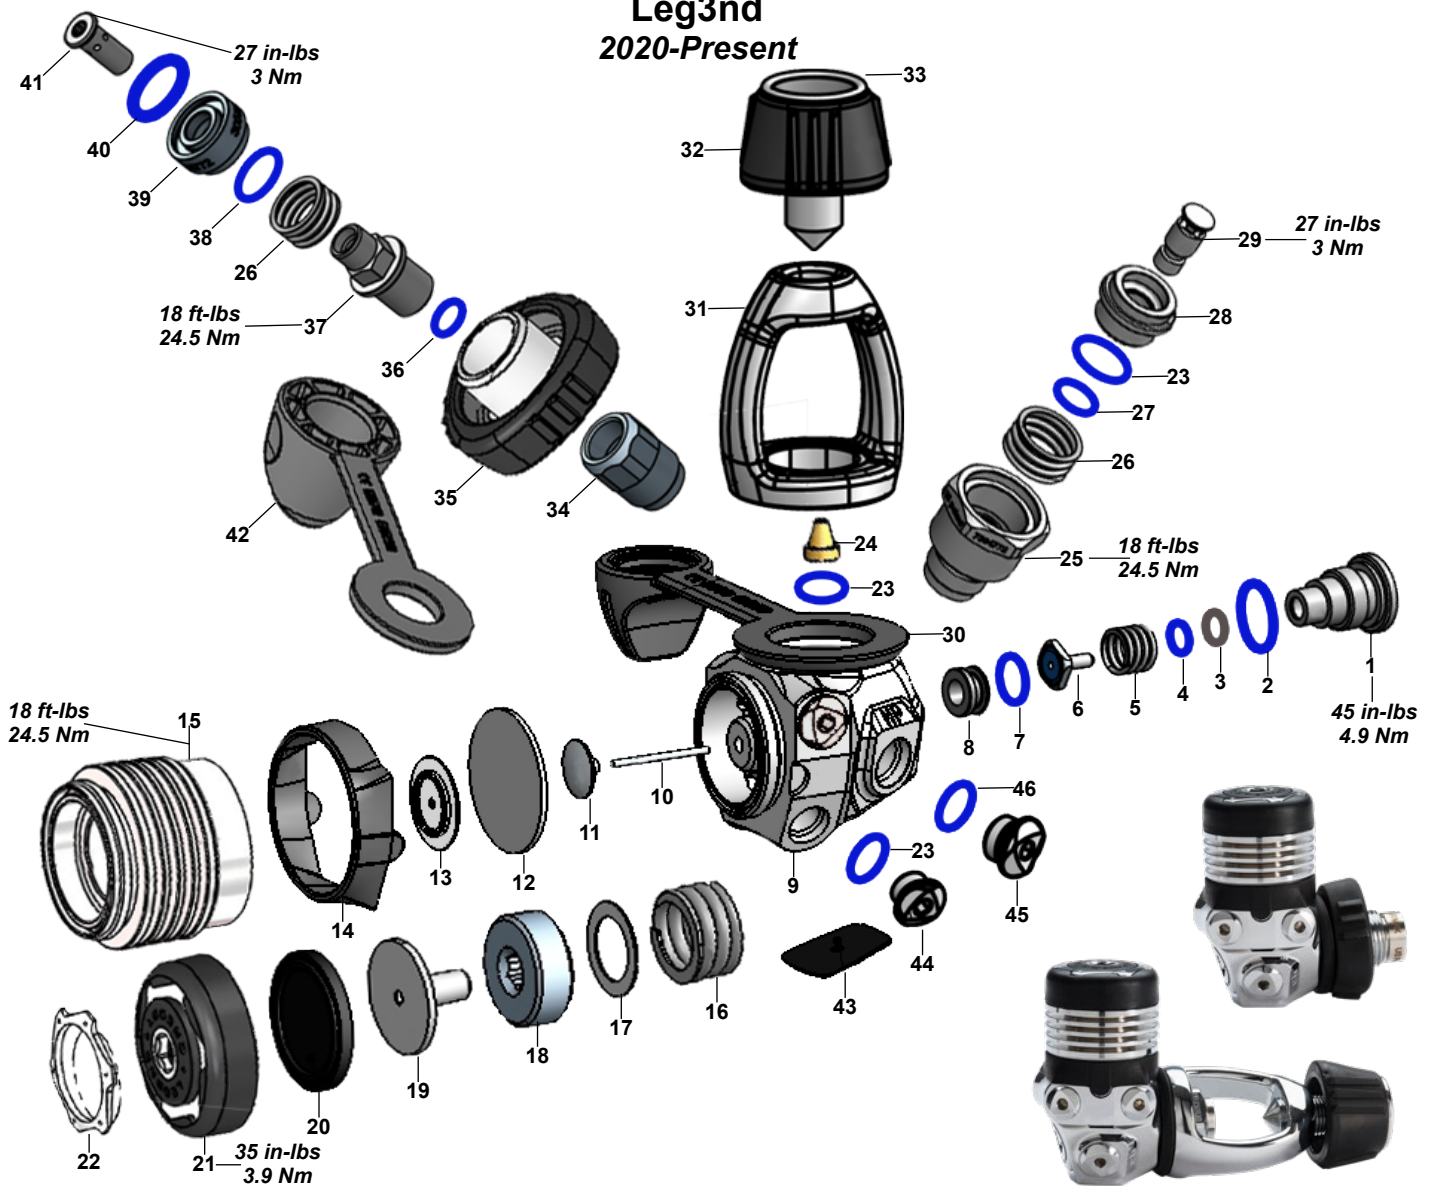

**086 = 86th day of the year (Julian calendar), March 26th**

This is the same method for all buoyancy products. If it has a Warning label, it has a LOT# which identifies the manufacturing date.

## Calypso 2004-Present

**NOTE:** \*In 2017, the yoke retainer (16) was changed to enable the use of a pre-filter (18) in addition to the conical filter.

**NOTE:** \*In 2010, the crown orifice is machined into the body. If you have damage to a body, yoke retainer or the removable crown orifice (11) on a pre-2010 model, you will need to replace the body (8) with the new revision along with the new yoke retainer (16). Please confirm which body style you have before ordering any replacement parts.

**\*NOTE:** The diaphragm retainer and purge cover for the pre-2009 Titan LX 2nd stage are no longer available. If the diaphragm retainer and/or purge cover become damaged or lost, you will need to replace both parts with the new Titan LX purge cover (p/n RG911592) and diaphragm retainer (p/n RG911667). "DO NOT" use the old diaphragm retainer with the new purge cover. The old/new purge cover retaining ring can be used with either purge cover.

**\*NOTE:** The purge cover and metal badge are no longer available. If either part needs to be replaced, you can substitute with Legend purge cover (p/n RG911685).
